- Miss Prachi Dhakad
- Miss Renuka

About the Department

Forensic Science is an emerging choice for new generation with the constant increase in awareness against crime and criminal justice system. This course was introduced in the institute with the help of Department of Chemistry in 2018 in view that the department will help in Criminal Justice System by providing quality education to forensic science students as they will be the future forensic expert of our nation. The students can also get advanced knowledge in this field by collaborating with Police Head Quarters, Central and Regional Forensic Science Laboratory as well as Cyber Cell located at Bhopal. The city is transforming itself as an emerging educational hub which will definitely be fruitful for students' career-related matters.

In short span of time department performed excellent team work in the field of training, workshops, guest lectures, peer group teaching etc. I wish the same for upcoming years.

Dr. Anjali Acharya
HOD Forensic Science

Departmental Activities

Vocational Course- Handwriting Identification and Recognition

About the course:

Forensic handwriting examination is the comparison of two similar types of writing to determine authorship. The main objective of forensic handwriting examination is to analyze, compare and evaluate the handwriting characteristics to determine if the handwriting was or was not prepared by the known writer. In many civil and criminal cases examination of handwriting become crucial and challenging part of the investigation. Thus, **"Handwriting Identification and Recognition"** is a specialized **Vocational Course** designed by the **Department of Forensic Science, IEHE, Bhopal (M.P.)** under NEP 2020 scheme. It is a 04 (01 theory + 3 Practical) credits course especially intended to enhance the professional skills in **Handwriting Identification and Recognition**. To study this course, a student must have passed class 1st Year in science or any stream.

Course Learning Outcomes:

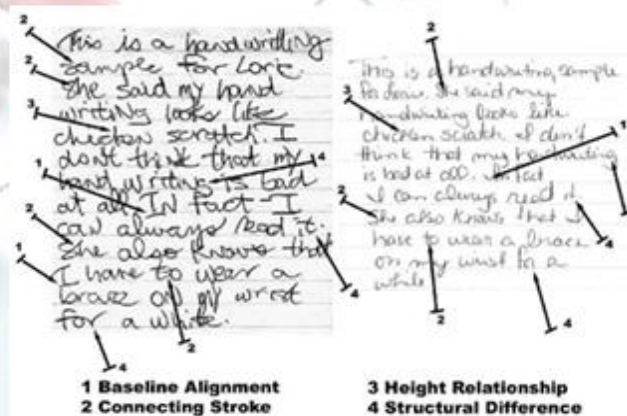

After completing this course the student will be able to-

- Learn important features in questioned documents, handwriting and its identification.
- Understand the basis of handwriting characteristics and the factors which influence handwriting of an individual.
- Perform the forensic examination of handwriting using different tools and techniques.

Expected Job Role/ Career Opportunities:

After completing this course, the student will be able to-

- Set up the private handwriting/signature examination laboratory.
- Offer opinion upon different cases related to handwriting/signature examination.
- Offer consultancy on questioned document examination.
- Get employment opportunities in the area of questioned document, signature and handwriting examination.
